

TECHNOPATH
CLINICAL DIAGNOSTICS

IN PARTNERSHIP WITH

THE QUALITY CONTROL COMPANY

Our customers increase the efficiency of their laboratory, improve the quality of their patient care and reduce the cost of their quality control program.

Technopath supplies quality products to:

hospitals, clinical laboratories, research laboratories and In Vitro Diagnostic companies

We are a global leader in the development, manufacturing and distribution of:

- Independent Quality Controls meeting accreditation guidelines
- Consolidated QC solution providing laboratory efficiency and cost effectiveness
- Comprehensive portfolio of Immunoassay, Chemistry and Serology products
- Interlaboratory PEER comparison software with automated data management
- QC Education and Training services

In 2008, Technopath Clinical Diagnostics launched the IVD industry's first truly consolidated Immunochemistry Quality Control (QC) materials. The Multichem® range of QC Materials were quickly followed up by IAMQC®, a range of QC software solutions to satisfy the growing requirements for IT solutions in a laboratory setting.

Test consolidated QC materials, coupled with streamlined software systems, provide the most efficient QC solution available on the market.

Technopath partners with the leading innovators in laboratory diagnostic instruments, automation and clinical standards to deliver QC solutions that are more broadly applicable to multiple assays and testing platforms, saving time and resources in the laboratory, and creating practical efficiencies.

“ With 14M tests per year impacting 3M patients, being able to provide identical testing is very important to us. When we were searching for a new vendor, what impressed us most about Technopath was that they were able to supply much greater lot sequestration, and their products are more broadly applicable to multiple assays and multiple testing platforms. That saves us a lot of work in the Laboratory”.

Dr. Dwayne Breining, MD

Northwell Health

TECHNOPATH
CLINICAL DIAGNOSTICS

VALUED BY OVER 13,000 LABORATORIES
IN OVER 120 COUNTRIES WORLDWIDE

QUALITY

- Independent, Third Party Controls meet accreditation guidelines.
- QC products target clinical decision points improving customer confidence in validity of results
- Human-based matrices enhance patient-like performance in practice

EFFICIENCIES

- The most consolidated QC solution supporting laboratory efficiency needs today
- Analyte consolidation leads to significant decrease in required logistics, inventory, freezer storage, packaging and consumables waste
- Automated QC lot configuration (XML files) and barcoded processes decrease handling time, TAT and user errors

SERVICE

- Ready to use QC supported by automatic data transfer, Peer comparison, and daily QC reports
- IAMQC Peer software integrated with cobas IT systems for ease of set up and reporting
- Advanced features including Target/TEa references, automated bias, MU reports in multiple languages
- QC Training and Education services, and troubleshooting support

“ The changeover to Technopath control was seamless, there are financial savings, also reduced technical time with the touches for quality control, also it’s a multi-assay vial which means less pours, less chance for error and less time on the analyzer. We look forward to continuing product development with Technopath in the future”.

Cari Gusman

Assistant VP, Clinical Laboratory Operations, Northwell Health
